Learning Management System
CHECKLIST

Does the LMS specialize in your industry or does it just claim it does?

The MotiveLMS was built for the Aviation Industry to administer federal and safety compliance of all employees in 2006. As we grew with our customers, we added functionality to support multiple base operations and employee qualification management. Now you can be confident your employee is current and qualified to work on and around your customer's aircraft.

	motiveLMS	LMS 2	LMS 3
Identifies missing enrollments through an **Electronic Training Matrix Report**	✓
